

File: EncoderPower.kicad_sch

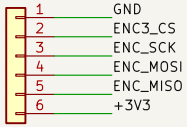

SPI0 RESERVED

Master: motion daughterboard.

Host GPIO16–21: input, no pulls.

One motion / splitter pair per backplane.

No hot insertion. Sensor cables retain their original pin order.

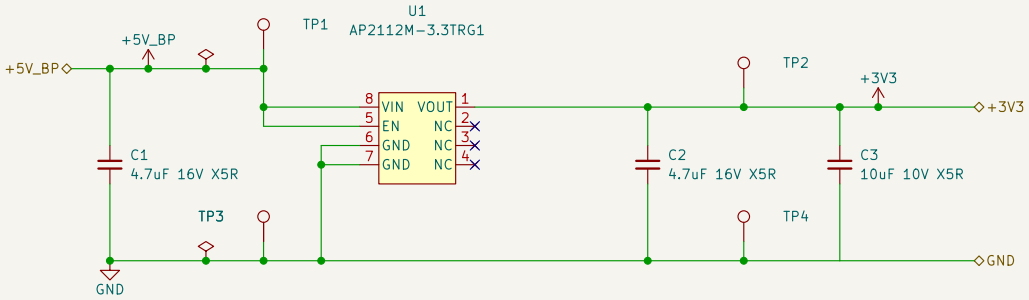

Existing sensor pinouts / motion card is SPI master

HackerFab / FAB Computer

KiCad E.D.A. 10.0.6		Id: 1/2

5 V from existing DIN contacts; 3.3 V remains local to this card.

Pull-ups keep every sensor deselected while the motion controller resets.

Bare IC daughterboard / engineering review
